

Toilet Replacement Program

**City of Alamo Heights
6116 Broadway, 78209**

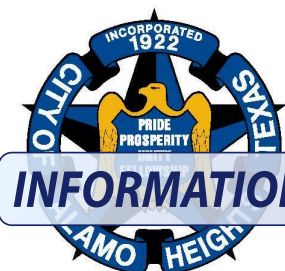

The City of Alamo Heights is partnering with Morrison Supply Company, a local plumbing supply company located at 10130 Jones Maltsberger Road, and Caroma, Inc., an international toilet manufacturer specializing in water-efficient fixtures, to provide vouchers for the purchase of water-efficient replacement toilets for all water customers at a reduced cost in addition to qualifying for a \$50.00 water bill credit with original proof of purchase. The vouchers will be limited to Alamo Heights water customers and two (2) vouchers and two (2) credits per occupied unit.

Eligible toilets are required to be High Efficiency Toilets (HET) as defined by the Environmental Protection Agency (EPA) which currently requires that the toilet utilize no more than 1.28 gallons per flush. In addition, each toilet shall have a Maximum Performance (MaP) flush rating of 500 grams or better, meaning that it must be able to flush at least 500 grams of material with each flush.

By replacing 3.5 to 5 gallon per flush toilets, the city estimates a savings of 8,130 gallons of water per year (approximately 22 gallons of water per toilet per day).

This voucher entitles the holder to purchase one (1) Caroma toilet at a reduced cost from Morrison Supply Company at 10130 Jones Maltsberger Road.
**\$110 - Standard,
\$120 - Elongated
\$130 - ADA (elongated with riser)**
